

Loading Instructions

All America Transportation provides customers with professional loading assistance. Listed below are a few tips for truckload shipments.

- * Make certain trailer is correctly aligned in dock door, dock plate is securely in place and wheels are chocked before entering trailer.
- * Consult driver before loading trailer especially when shipment may be heavy. Be sure to distribute the weight evenly over the entire 48' or 53' length of trailer.

- * 48' Van trailers may be loaded with up to 22-24 skids depending on skid dimensions.
- * 53' Van trailers may be loaded with up to 26-28 skids depending on skid dimensions.
- * Skids may have to pin wheeled in order to fill van up to full capacity.
- * Van trailers may be loaded up to a capacity of 44,000 to 45,000 lbs
- * Before driver leaves with shipment, make sure the bill of lading has been signed, driver retains copy, and shipper retains copy.
